“Out and About” with Visual Records

Over the past few months, Tricia Jackson, Sales Manager for Visual Records, has been busy representing the company at several area events.

In April, she attended the Southern California Business Summit held at the South Coast Winery in Temecula. This beautiful venue hosted over forty exhibitors including local municipal governments, school districts, and large firms such as Abbott Vascular,

Southern California Edison, Verizon, Southern California Gas Company plus many of the banks in Temecula Valley. The event was initiated by the Southwest California Economic Development Department and proved to be one of the top networking events we have attended.

May found Tricia traveling to Camp Pendleton for their 10th Annual Chamber of Commerce Day. In the morn-

ing, various speakers provided valuable information on how local companies could do business with the base followed by a delicious lunch and then breakout time with base representatives. This allowed attendees a chance to connect with specific base department heads to ask questions and gather business cards and informational handouts.

At the end of May, Temecula's Mayor Maryann Edwards hosted a Tea and Luncheon at the Truffles and Lace Tea Parlour in Old Town Temecula. Tricia enjoyed meeting Ms. Edwards who is very personable and approachable and has proven herself to be a dynamic Mayor during her term. Her past history of public service sets a fine example for all of us.

After all of these public events, it was quite a change of pace to attend a “Virtual Trade Show” webinar entitled “All About eCommerce.” Strategic Keynote Speakers, Live Audio Chats, Roundtable eChats, Live webinars and an “Exhibit Hall” with various vendor booths to visit provided an abundant amount of information and new contacts who will be of invaluable assistance as Visual Records explores this new market.

☑ *MedCorr 2.8 Upgrades Completed*

Kaiser Permanente facilities in Southern and Northern California have upgraded their MedCorr Release of Information (ROI) software system to the newest version of MedCorr, Version 2.8. The facilities in Southern California have been using MedCorr, Version 2.7, since June of last year, while the facilities in Northern California have been using MedCorr 2.6 since 2007.

This upgrade includes more than 50 enhancements, which were specifically developed as a result of the increasing volume of sites using the ROI application and ongoing collaboration with managers and users. Some major changes include addition of FMLA forms from the Department of Labor, modification of request notes security, and option of making a department private so that users from other departments cannot view or access their request information.

Other important features in this upgrade is an optional Form Filler module, which automatically enters certain patient or request information on a selected document, and an optional Legal Scheduling module, which allows users to manage legal scheduling information such as appointments, payments and invoices.

Currently, there are over 500 California users in various medical correspondence, insurance, disability, patient access, occupational health and psychiatric departments using MedCorr.

If you are interested in getting more information about our new Form Filler or Legal Scheduling modules, please contact sales@visualrecords.com. We'd love to show you what these exciting modules can do!

A LITTLE HELP GOES A LONG WAY

Visual Records has not only been busy with local area events, but has been searching for ways to give back to our community. With the current economy drastically affecting many local residents, the homeless population in our valley has skyrocketed. John Schaffer, our CEO, and Tricia attended a meeting of Project T.O.U.C.H., a forum that utilizes faith based organizations, non-profits, business and governmental agencies to help restore people's lives. These include the new Temecula-Murrieta Rescue Mission, the Salvation Army, Representatives from the Riverside Sheriff's Department, and local community food pantries.

We will keep you up to date on our progress in this area but would like to encourage everyone to contact your local non-profit organizations to see if there is something you can do to make a difference in someone's life today.

*“Developing Innovative Software
Products for Your Industry”*

QUOTE OF THE DAY

“Perseverance is a great element of success. If you only knock long enough and loud enough at the gate, you are sure to wake up somebody.”

– Henry Wadsworth Longfellow

THE VISUAL RECORDS STORY

Visual Records specializes in developing innovative and high-quality software products and systems for all industries. By partnering with entrepreneurs and visionaries, we launch new and successful software products.

Headquartered in Murrieta, California, Visual Records combines research, experience and value with integrity and respect. For over 20 years, we have kept the following commitments:

1. **Vision:** Designing beyond what is considered "standard."
2. **Flexibility:** Working closely to deliver solutions in a timely and cost-effective manner.
3. **Integrity:** Making long-term partners through honesty, tenacity and consideration.
4. **Support:** Ensuring that our customers remain completely satisfied.
